The Standard in Measuring Color & Light

Giving Shape to Ideas

The spectrophotometer CM-25cG is a two-in-one model for simultaneous color and gloss measurement.

Display examples

The 2.7-inch TFT color LCD makes measurements easy to read, and the easy-to-understand GUI provides high usability.

Form and functions designed specifically for quality control of color and gloss of automotive interior trim. The industry's next standard model.

Ideal form and functions for measuring automotive interiors

The CM-25cG's sleek, compact, lightweight body is easy to hold, and can measure even in narrow, deep-set spaces. Additionally, changeable apertures allow measurements of subjects which are small or curved.

Color : $\varnothing 8$ mm/ $\varnothing 3$ mm
Gloss : $\varnothing 10$ mm/ $\varnothing 3$ mm

A two-in-one model for color and gloss

The CM-25cG greatly improves work efficiency by eliminating the need to switch between two instruments — one for color, one for gloss — for each measurement, thus reducing takt time, and providing color and gloss data from exactly the same measurement point for more accurate quality control.

High inter-instrument agreement

The CM-25cG offers high inter-instrument agreement of within $\Delta E^* 0.15$ (typical) (MAV) for color and ± 0.2 GU for gloss measurements of 1 to 10 GU. This high inter-instrument agreement enables digital data management for more efficient quality control among your factories or between your company and your partners.

High repeatability and user friendliness

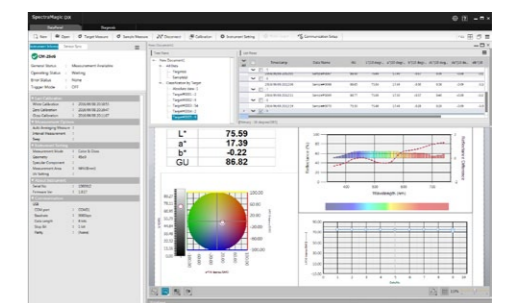

By using a $45^\circ c:0^\circ$ illumination/viewing system with ring-shaped illumination having light sources radially located at certain intervals, the CM-25cG provides stable data while minimizing instrument rotational effects. The system also provides data with high accuracy and repeatability even if there is a small gap between the measurement aperture and the subject.

Other features include high-speed measurement, cable-free operation, and viewing ports and measuring buttons on both the right and left sides of the instrument body for easy operation and high measurement stability in any situation.

* Level of subject visibility through viewing port depends on measurement subject.

Color Data Software SpectraMagic DX (Option) Professional Edition (Version. 1.0) Lite Edition

The new Color Data Software SpectraMagic DX enables easy management of data measured with the CM-25cG, and offers a new Instrument Diagnosis function to help ensure continued high instrument performance.
